Bassed on a True Story: The Next Chapter in Hudson on Bass' Musical Utopia

Overview

Introduction

Celebrating his sophomore release, Washington, D.C. native/Atlanta transplant, Hudson on Bass (HOB) offers a diverse and emotional journey by capturing the anthems of his life through song on **“Bassed on a True Story.”** HOB’s debut CD, **“Bassically Yours,”** showcased the artist’s multi-faceted musicality and adoration of his prized instrument.

Each original track on this new effort represents an episode in HOB’s sometimes dramatic, yet ever expanding human experience. It details his triumph over heartbreak and pain and celebrates the joy of tested and enduring love. The infectiously hip and groovy **“I’m Gone,”** delivers an infatuating and mesmerizingly funky chant written to announce his departure from a relationship. On **“Truth Be Told”** after a lover’s betrayal, the artist urges her to just **“tell the truth,”** and provides a treat that is so reminiscent and fresh, both Old School and New School fans can enjoy. This beat both moves and grooves and urges one to put on their dancing shoes. His **“Live, Love, Laugh”** showcases the artist’s mastery of the spoken word and his deep-throated vocals are lyrically soothing and romantically smooth as he expresses appreciation to his special lady for all the unforgettable ways she makes him feel.

While his covers of Teena Marie’s **“Square Biz”** and TLC’s **“Don’t Go Chasing Waterfalls,”** will keep new fans captivated and old fans rocking in sync with his updated takes on these hit songs. **Only You (Can Make Me Happy)** a song HOB says was written directly to his Bass Guitar. GRAMMY AWARD WINNER (trumpeter) Russell Gunn contributes his unique artistry on this track.

HOB’s ability to effortlessly blend hip-hop and jazz (well-noted on this album) has incited fans to call him **“a creative master.”** With this 13-track release (a hidden bonus track **“Don’t Stop the Music,”** is discreetly nestled 60 seconds after track 12 ends) HOB highlights his traditional and smooth jazz influences and teasingly offers listeners an invitation to a nearly eargasmic experience.
